The Atlantic World, 1492–1800

Previewing Main Ideas

**CULTURAL INTERACTION** The voyages of Columbus prompted a worldwide exchange of everything from religious and political ideas to new foods and plants.

**Geography** According to the map, what lands were included in the viceroyalty of New Spain in 1700?

**ECONOMICS** The vast wealth to be had from colonizing the Americas sealed the fate of millions of Native Americans and Africans who were forced to work in mines and on plantations.

**Geography** On which coast of the Americas would enslaved persons from Africa have arrived?

**EMPIRE BUILDING** Over the span of several centuries, Europeans conquered the Americas’ native inhabitants and built powerful American empires.

**Geography** What two major Native American empires did the Spanish conquer in the sixteenth century?

**AMERICAS**
- 1492: Columbus makes first voyage.
- 1521: Cortés conquers Aztec Empire.
- 1533: Pizarro conquers Incan Empire.
- 1607: English found Jamestown.

**WORLD**
- 1494: Spain and Portugal sign Treaty of Tordesillas.
- 1547: Ivan the Terrible assumes throne of Russia.
- 1603: Tokugawa shoguns rule Japan.
What might you gain or lose by joining the fight?

You are a Native American living in central Mexico in 1520. Suddenly you are faced with a decision that may change your life forever. Invaders, known as the Spanish, are engaged in a fierce battle with the nearby Aztecs, who are cruel and harsh rulers. Like many of your people, you hate the powerful Aztecs and hope for their defeat. The newcomers, however, are equally frightening. They ride on large beasts and fire loud, deadly weapons. You wonder whether you should follow the example of your friends and join the fight, or not fight at all.

EXAMINING the ISSUES

- What are the advantages and disadvantages of not fighting?
- Which might be the lesser of two evils—supporting the Aztecs, whom you know as oppressors, or the fierce invaders, about whom you know almost nothing?

Discuss these questions with your classmates. In your discussion, examine whether invading armies throughout history have made life better or worse for people in the areas they conquer. As you read about colonization in the Americas, learn the outcome of the battle between the Aztecs and the Spanish.

▲ This 16th-century painting by an Indian artist depicts a battle on the left between the Aztecs and Spanish. The right side shows the Spanish with their main Indian allies, the Tlaxcalans.
Spain Builds an American Empire

**MAIN IDEA**

**EMPIRE BUILDING** The voyages of Columbus prompted the Spanish to establish colonies in the Americas.

**WHY IT MATTERS NOW**

Throughout the Americas, Spanish culture, language, and descendants are the legacy of this period.

**SETTING THE STAGE**

Competition for wealth in Asia among European nations was fierce. This competition prompted a Genoese sea captain named Christopher Columbus to make a daring voyage from Spain in 1492. Instead of sailing south around Africa and then east, Columbus sailed west across the Atlantic in search of an alternate trade route to Asia and its riches. Columbus never reached Asia. Instead, he stepped onto an island in the Caribbean. That event would bring together the peoples of Europe, Africa, and the Americas.

**The Voyages of Columbus**

The *Niña, Pinta, and Santa María* sailed out of a Spanish port around dawn on August 3, 1492. In a matter of months, Columbus’s fleet would reach the shores of what Europeans saw as an astonishing new world.

**First Encounters** In the early hours of October 12, 1492, the long-awaited cry came. A lookout aboard the *Pinta* caught sight of a shoreline in the distance. “Tierra! Tierra!” he shouted. “Land! Land!” By dawn, Columbus and his crew were ashore. Thinking he had successfully reached the East Indies, Columbus called the surprised inhabitants who greeted him, *los indios*. The term translated into “Indian,” a word mistakenly applied to all the native peoples of the Americas. In his journal, Columbus recounted his first meeting with the native peoples:

**PRIMARY SOURCE**

I presented them with some red caps, and strings of glass beads to wear upon the neck, and many other trifles of small value, wherewith they were much delighted, and became wonderfully attached to us. Afterwards they came swimming to the boats where we were, bringing parrots, balls of cotton thread, javelins, and many other things which they exchanged for articles we gave them . . . in fact they accepted anything and gave what they had with the utmost good will.

*CHRISTOPHER COLUMBUS, Journal of Columbus*

Columbus had miscalculated where he was. He had not reached the East Indies. Scholars believe he landed instead on an island in the Bahamas in the Caribbean Sea. The natives there were not Indians, but a group who called themselves the Taino. Nonetheless, Columbus claimed the island for Spain. He named it San Salvador, or “Holy Savior.”
Columbus, like other explorers, was interested in gold. Finding none on San Salvador, he explored other islands, staking his claim to each one. “It was my wish to bypass no island without taking possession,” he wrote.

In early 1493, Columbus returned to Spain. The reports he relayed about his journey delighted the Spanish monarchs. Spain’s rulers, who had funded his first voyage, agreed to finance three more trips. Columbus embarked on his second voyage to the Americas in September of 1493. He journeyed no longer as an explorer, but as an empire builder. He commanded a fleet of some 17 ships that carried over 1,000 soldiers, crewmen, and colonists. The Spanish intended to transform the islands of the Caribbean into colonies, or lands that are controlled by another nation. Over the next two centuries, other European explorers began sailing across the Atlantic in search of new lands to claim.

**Other Explorers Take to the Seas** In 1500, the Portuguese explorer Pedro Álvares Cabral reached the shores of modern-day Brazil and claimed the land for his country. A year later, Amerigo Vespucci (vehs•POO•chee), an Italian in the service of Portugal, also traveled along the eastern coast of South America. Upon his return to Europe, he claimed that the land was not part of Asia, but a “new” world. In 1507, a German mapmaker named the new continent “America” in honor of Amerigo Vespucci.

In 1519, Portuguese explorer Ferdinand Magellan led the boldest exploration yet. Several years earlier, Spanish explorer Vasco Núñez de Balboa had marched through modern-day Panama and had become the first European to gaze upon the Pacific Ocean. Soon after, Magellan convinced the king of Spain to fund his voyage into the newly discovered ocean.

With about 250 men and five ships, Magellan sailed around the southern end of South America and into the waters of the Pacific. The fleet sailed for months without seeing land, except for some small islands. Food supplies soon ran out.

After exploring the island of Guam, Magellan and his crew eventually reached the Philippines. Unfortunately, Magellan became involved in a local war there and was killed. His crew, greatly reduced by disease and starvation, continued sailing west toward home. Out of Magellan’s original crew, only 18 men and one ship arrived back in Spain in 1522, nearly three years after they had left. They were the first persons to circumnavigate, or sail around, the world.

**Spanish Conquests in Mexico**

In 1519, as Magellan embarked on his historic voyage, a Spaniard named Hernando Cortés landed on the shores of Mexico. After colonizing several Caribbean islands, the Spanish had turned their attention to the American mainland. Cortés marched inland, looking to claim new lands for Spain. Cortés and the many other Spanish explorers who followed him were known as conquistadors (conquerors). Lured by rumors of vast lands filled with gold and silver, conquistadors carved out colonies in regions that would become Mexico, South America, and the United States. The Spanish were the first European settlers in the Americas. As a result of their colonization, the Spanish greatly enriched their empire and left a mark on the cultures of North and South America that exists today.

- Dutch

**GEOGRAPHY SKILLBUILDER: Interpreting Maps**

1. **Movement** How many different voyages did Columbus make to the Americas?
2. **Region** Which general region did the Spanish and Portuguese explore? Where did the English, Dutch, and French explore?
Cortés Conquers the Aztecs  Soon after landing in Mexico, Cortés learned of the vast and wealthy Aztec Empire in the region’s interior. (See Chapter 16.) After marching for weeks through difficult mountain passes, Cortés and his force of roughly 600 men finally reached the magnificent Aztec capital of Tenochtitlán (teh•NAWCH•tee•TLAHN). The Aztec emperor, Montezuma II, was convinced at first that Cortés was a god wearing armor. He agreed to give the Spanish explorer a share of the empire’s existing gold supply. The conquistador was not satisfied. Cortés admitted that he and his comrades had a “disease of the heart that only gold can cure.”

In the late spring of 1520, some of Cortés’ men killed many Aztec warriors and chiefs while they were celebrating a religious festival. In June of 1520, the Aztecs rebelled against the Spanish intruders and drove out Cortés’ forces. The Spaniards, however, struck back. Despite being greatly outnumbered, Cortés and his men conquered the Aztecs in 1521. Several factors played a key role in the stunning victory. First, the Spanish had the advantage of superior weaponry. Aztec arrows were no match for the Spaniards’ muskets and cannons.

Second, Cortés was able to enlist the help of various native groups. With the aid of a native woman translator named Malinche, Cortés learned that some natives resented the Aztecs. They hated their harsh practices, including human sacrifice. Through Malinche, Cortés convinced these natives to fight on his side.

Finally, and most important, the natives could do little to stop the invisible warrior that marched alongside the Spaniards—disease. Measles, mumps, smallpox, and typhus were just some of the diseases Europeans were to bring with them to the Americas. Native Americans had never been exposed to these diseases. Thus, they had developed no natural immunity to them. As a result, they died by the hundreds of thousands. By the time Cortés launched his counterattack, the Aztec population had been greatly reduced by smallpox and measles. In time, European disease would truly devastate the natives of central Mexico, killing millions of them.

Spanish Conquests in Peru

In 1532, another conquistador, Francisco Pizarro, marched a small force into South America. He conquered the Incan Empire, as you learned in Chapter 16.

Pizarro Subdues the Inca  Pizarro and his army of about 200 met the Incan ruler, Atahualpa (Air•tuh•WAHL•puh), near the city of Cajamarca. Atahualpa, who commanded a force of about 30,000, brought several thousand mostly unarmed men for the meeting. The Spaniards waited in ambush, crushed the Incan force, and kidnapped Atahualpa.

Atahualpa offered to fill a room once with gold and twice with silver in exchange for his release. However, after receiving the ransom, the Spanish strangled the Incan king. Demoralized by their leader’s death, the remaining Incan force retreated from Cajamarca. Pizarro then marched on the Incan capital, Cuzco. He captured it without a struggle in 1533.
As Cortés and Pizarro conquered the civilizations of the Americas, fellow conquistadors defeated other native peoples. Spanish explorers also conquered the Maya in Yucatan and Guatemala. By the middle of the 16th century, Spain had created an American empire. It included New Spain (Mexico and parts of Guatemala), as well as other lands in Central and South America and the Caribbean.

**Spain’s Pattern of Conquest** In building their new American empire, the Spaniards drew from techniques used during the *reconquista* of Spain. When conquering the Muslims, the Spanish lived among them and imposed their Spanish culture upon them. The Spanish settlers to the Americas, known as *peninsulares*, were mostly men. As a result, relationships between Spanish settlers and native women were common. These relationships created a large *mestizo*—or mixed Spanish and Native American—population.

Although the Spanish conquerors lived among the native people, they also oppressed them. In their effort to exploit the land for its precious resources, the Spanish forced Native Americans to work within a system known as *encomienda*. Under this system, natives farmed, ranched, or mined for Spanish landlords. These landlords had received the rights to the natives’ labor from Spanish authorities. The holders of *encomiendas* promised the Spanish rulers that they would act fairly and respect the workers. However, many abused the natives and worked many laborers to death, especially inside dangerous mines.

**The Portuguese in Brazil** One area of South America that remained outside of Spanish control was Brazil. In 1500, Cabral claimed the land for Portugal. During the 1530s, colonists began settling Brazil’s coastal region. Finding little gold or silver, the settlers began growing sugar. Clearing out huge swaths of forest land, the Portuguese built giant sugar plantations. The demand for sugar in Europe was great, and the colony soon enriched Portugal. In time, the colonists pushed farther west into Brazil. They settled even more land for the production of sugar.

---

### History Makers

**Francisco Pizarro 1475?–1541**

Pizarro was the son of an infantry captain and a young peasant woman. His parents never married. Raised by his mother’s poor family, he never learned to read. Ambitious, brave, and ruthless, he determined to make his fortune as an explorer and conqueror.

Embarked on a voyage of conquest down the west coast of South America, Pizarro was ordered by the governor of Panama to abandon the expedition to prevent the loss of lives. Pizarro took his sword and drew a line in the dust, inviting those of his followers who desired wealth and fame to cross the line and follow him. Thus began the conquest of Peru.

Pizarro founded the city of Lima, Peru’s capital, in 1535. He became governor of Peru and encouraged settlers from Spain.

**Atahualpa 1502?–1533**

Atahualpa was the last ruler of the Incan empire in Peru. After Atahualpa was captured and held for ransom by the Spanish, the Incan people throughout the empire brought gold and silver that the Spanish then had melted down into bullion and ingots. They accumulated 24 tons of gold and silver, the richest ransom in history.

The Spanish executed Atahualpa despite the ransom paid by his people. As he was about to be burned at the stake, the Spanish offered him a more merciful death by strangulation if he agreed to convert to Christianity, which he did. Thus died the last emperor of the Inca.

Contrasting How did Spain’s colony in New Mexico differ from its colonies in New Spain?

Spain’s Influence Expands

Spain’s American colonies helped make it the richest, most powerful nation in the world during much of the 16th century. Ships filled with treasures from the Americas continually sailed into Spanish harbors. This newfound wealth helped usher in a golden age of art and culture in Spain. (See Chapter 21.)

Throughout the 16th century, Spain also increased its military might. To protect its treasure-filled ships, Spain built a powerful navy. The Spanish also strengthened their other military forces, creating a skillful and determined army. For a century and a half, Spain’s army seldom lost a battle. Meanwhile, Spain enlarged its American empire by settling in parts of what is now the United States.

Conquistadors Push North Dreams of new conquests prompted Spain to back a series of expeditions into the southwestern United States. The Spanish actually had settled in parts of the United States before they even dreamed of building an empire on the American mainland. In 1513, Spanish explorer Juan Ponce de León landed on the coast of modern-day Florida and claimed it for Spain.

By 1540, after building an empire that stretched from Mexico to Peru, the Spanish once again looked to the land that is now the United States. In 1540–1541, Francisco Vásquez de Coronado led an expedition throughout much of present-day Arizona, New Mexico, Texas, Oklahoma, and Kansas. He was searching for another wealthy empire to conquer. Coronado found little gold amidst the dry deserts of the Southwest. As a result, the Spanish monarchy assigned mostly priests to explore and colonize the future United States.

Catholic priests had accompanied conquistadors from the very beginning of American colonization. The conquistadors had come in search of wealth. The priests who accompanied them had come in search of converts. In the winter of 1609–1610, Pedro de Peralta, governor of Spain’s northern holdings, called New Mexico, led settlers to a tributary on the upper Rio Grande. They built a capital called Santa Fe, or “Holy Faith.” In the next two decades, a string of Christian missions arose among the Pueblo, the native inhabitants of the region. Scattered missions, forts, and small ranches dotted the lands of New Mexico. These became the headquarters for advancing the Catholic religion.

MAIN IDEA

Contrasting How did Spain’s colony in New Mexico differ from its colonies in New Spain?
Opposition to Spanish Rule

Spanish priests worked to spread Christianity in the Americas. They also pushed for better treatment of Native Americans. Priests spoke out against the cruel treatment of natives. In particular, they criticized the harsh pattern of labor that emerged under the encomienda system. “There is nothing more detestable or more cruel,” Dominican monk Bartolomé de Las Casas wrote, “than the tyranny which the Spaniards use toward the Indians for the getting of pearl [riches].”

African Slavery and Native Resistance The Spanish government abolished the encomienda system in 1542. To meet the colonies’ need for labor, Las Casas suggested Africans. “The labor of one . . . [African] . . . [is] more valuable than that of four Indians,” he said. The priest later changed his view and denounced African slavery. However, others promoted it.

Opposition to the Spanish method of colonization came not only from Spanish priests, but also from the natives themselves. Resistance to Spain’s attempt at domination began shortly after the Spanish arrived in the Caribbean. In November of 1493, Columbus encountered resistance in his attempt to conquer the present-day island of St. Croix. Before finally surrendering, the inhabitants defended themselves by firing poison arrows.

As late as the end of the 17th century, natives in New Mexico fought Spanish rule. Although they were not risking their lives in silver mines, the natives still felt the weight of Spanish force. In converting the natives, Spanish priests and soldiers burned their sacred objects and prohibited native rituals. The Spanish also forced natives to work for them and sometimes abused them physically.

In 1680, Popé, a Pueblo ruler, led a well-organized rebellion against the Spanish. The rebellion involved more than 8,000 warriors from villages all over New Mexico. The native fighters drove the Spanish back into New Spain. For the next 12 years, until the Spanish regained control of the area, the southwest region of the future United States once again belonged to its original inhabitants.

By this time, however, the rulers of Spain had far greater concerns. The other nations of Europe had begun to establish their own colonies in the Americas.
The Legacy of Columbus

In the years and centuries since Christopher Columbus’s historic journeys, people still debate the legacy of his voyages. Some argue they were the heroic first steps in the creation of great and democratic societies. Others claim they were the beginnings of an era of widespread cruelty, bloodshed, and epidemic disease.

A. Secondary Source

Samuel Eliot Morison

Morison, a strong supporter of Columbus, laments that the sea captain died without realizing the true greatness of his deeds.

One only wishes that the Admiral might have been afforded the sense of fulfillment that would have come from foreseeing all that flowed from his discoveries; that would have turned all the sorrows of his last years to joy. The whole history of the Americas stems from the Four Voyages of Columbus; and as the Greek city-states looked back to the deathless gods as their founders, so today a score of independent nations and dominions unite in homage to Christopher, the stout-hearted son of Genoa, who carried Christian civilization across the Ocean Sea.

B. Primary Source

Bartolomé de Las Casas

Las Casas was an early Spanish missionary who watched fellow Spaniards unleash attack dogs on Native Americans.

Their other frightening weapon after the horses: twenty hunting greyhounds. They were unleashed and fell on the Indians at the cry of Tómalo! ["Get them!"]. Within an hour they had preyed on one hundred of them. As the Indians were used to going completely naked, it is easy to imagine what the fierce greyhounds did, urged to bite naked bodies and skin much more delicate than that of the wild boars they were used to. . . . This tactic, begun here and invented by the devil, spread throughout these Indies and will end when there is no more land nor people to subjugate and destroy in this part of the world.

C. Secondary Source

Suzan Shown Harjo

Harjo, a Native American, disputes the benefits that resulted from Columbus’s voyages and the European colonization of the Americas that followed.

Columbus Day, never on Native America’s list of favorite holidays, became somewhat tolerable as its significance diminished to little more than a good shopping day. But this next long year [1992] of Columbus hoopla will be tough to take amid the spending sprees and horn blowing to tout a five-century feeding frenzy that has left Native people and this red quarter of Mother Earth in a state of emergency. For Native people, this half millennium of land grabs and one-cent treaty sales has been no bargain.

D. Primary Source

Anonymous

Contemporary with the Spanish conquest of the Americas, this illustration depicts a medicine man tending to an Aztec suffering from smallpox, which killed millions of Native Americans.

Document-Based Questions

1. Based on Source A, was the legacy of Columbus a positive or negative thing?
2. In what ways do Sources B and C agree about Columbus?
3. Which aspect of the legacy of Columbus does the illustration in Source D show?
4. If you had to construct a balance sheet on Columbus, would you come up with a positive or negative balance? On a poster board, make up a list of positive and negative elements, and display your chart in the classroom.
European Nations Settle North America

MAIN IDEA
Several European nations fought for control of North America, and England emerged victorious.

WHY IT MATTERS NOW
The English settlers in North America left a legacy of law and government that guides the United States today.

TERMS & NAMES
- New France
- Jamestown
- Pilgrims
- Puritans
- New Netherland
- French and Indian War
- Metacom

SETTING THE STAGE
Spain’s successful colonization efforts in the Americas did not go unnoticed. Other European nations, such as England, France, and the Netherlands, soon became interested in obtaining their own valuable colonies. The Treaty of Tordesillas, signed in 1494, had divided the newly discovered lands between Spain and Portugal. However, other European countries ignored the treaty. They set out to build their own empires in the Americas. This resulted in a struggle for North America.

Competing Claims in North America
Magellan’s voyage showed that ships could reach Asia by way of the Pacific Ocean. Spain claimed the route around the southern tip of South America. Other European countries hoped to find an easier and more direct route to the Pacific. If it existed, a northwest trade route through North America to Asia would become highly profitable. Not finding the route, the French, English, and Dutch instead established colonies in North America.

Explorers Establish New France
The early French explorers sailed west with dreams of reaching the East Indies. One explorer was Giovanni da Verrazzano (vehr•uh•ZAHN•noh), an Italian in the service of France. In 1524, he sailed to North America in search of a sea route to the Pacific. While he did not find the route, Verrazzano did discover what is today New York harbor. Ten years later, the Frenchman Jacques Cartier (kahr•TY AY) reached a gulf off the eastern coast of Canada that led to a broad river. Cartier named it the St. Lawrence. He followed it inward until he reached a large island dominated by a mountain. He named the island Mont Real (Mount Royal), which later became known as Montreal. In 1608, another French explorer, Samuel de Champlain, sailed up the St. Lawrence with about 32 colonists. They founded Quebec, which became the base of France’s colonial empire in North America, known as New France.

Then the French penetrated the North American continent. In 1673, French Jesuit priest Jacques Marquette and trader Louis Joliet explored the Great Lakes and the upper Mississippi River. Nearly 10 years later, Sieur de La Salle explored the lower Mississippi. He claimed the entire river valley for France. He named it Louisiana in honor of the French king, Louis XIV. By the early 1700s, New France covered much of what is now the midwestern United States and eastern Canada.
A Trading Empire France’s North American empire was immense. But it was sparsely populated. By 1760, the European population of New France had grown to only about 65,000. A large number of French colonists had no desire to build towns or raise families. These settlers included Catholic priests who sought to convert Native Americans. They also included young, single men engaged in what had become New France’s main economic activity, the fur trade. Unlike the English, the French were less interested in occupying territories than they were in making money off the land.

The English Arrive in North America

The explorations of the Spanish and French inspired the English. In 1606, a company of London investors received from King James a charter to found a colony in North America. In late 1606, the company’s three ships, and more than 100 settlers, pushed out of an English harbor. About four months later, in 1607, they reached the coast of Virginia. The colonists claimed the land as theirs. They named the settlement Jamestown in honor of their king.

The Settlement at Jamestown The colony’s start was disastrous. The settlers were more interested in finding gold than in planting crops. During the first few years, seven out of every ten people died of hunger, disease, or battles with the Native Americans.

Despite their nightmarish start, the colonists eventually gained a foothold in their new land. Jamestown became England’s first permanent settlement in North America. The colony’s outlook improved greatly after farmers there discovered tobacco. High demand in England for tobacco turned it into a profitable cash crop.

Puritans Create a “New England” In 1620, a group known as Pilgrims founded a second English colony, Plymouth, in Massachusetts. Persecuted for their religious beliefs in England, these colonists sought religious freedom. Ten years later, a group known as Puritans also sought religious freedom from England’s Anglican Church. They established a larger colony at nearby Massachusetts Bay.
The Puritans wanted to build a model community that would set an example for other Christians to follow. Although the colony experienced early difficulties, it gradually took hold. This was due in large part to the numerous families in the colony, unlike the mostly single, male population in Jamestown.

**The Dutch Found New Netherland** Following the English and French into North America were the Dutch. In 1609, Henry Hudson, an Englishman in the service of the Netherlands, sailed west. He was searching for a northwest sea route to Asia. Hudson did not find a route. He did, however, explore three waterways that were later named for him—the Hudson River, Hudson Bay, and Hudson Strait.

The Dutch claimed the region along these waterways. They established a fur trade with the Iroquois Indians. They built trading posts along the Hudson River at Fort Orange (now Albany) and on Manhattan Island. Dutch merchants formed the Dutch West India Company. In 1621, the Dutch government granted the company permission to colonize the region and expand the fur trade. The Dutch holdings in North America became known as **New Netherland**.

Although the Dutch company profited from its fur trade, it was slow to attract Dutch colonists. To encourage settlers, the colony opened its doors to a variety of peoples. Gradually more Dutch, as well as Germans, French, Scandinavians, and other Europeans, settled the area.

**Colonizing the Caribbean** During the 1600s, the nations of Europe also colonized the Caribbean. The French seized control of present-day Haiti, Guadeloupe, and Martinique. The English settled Barbados and Jamaica. In 1634, the Dutch captured what are now the Netherlands Antilles and Aruba from Spain.

On these islands, the Europeans built huge cotton and sugar plantations. These products, although profitable, demanded a large and steady supply of labor. Enslaved Africans eventually would supply this labor.

**The Struggle for North America**

As they expanded their settlements in North America, the nations of France, England, and the Netherlands battled each other for colonial supremacy.

**The English Oust the Dutch** To the English, New Netherland separated their northern and southern colonies. In 1664, the English king, Charles II, granted his brother, the Duke of York, permission to drive out the Dutch. When the duke’s fleet arrived at New Netherland, the Dutch surrendered without firing a shot. The Duke of York claimed the colony for England and renamed it New York.

With the Dutch gone, the English colonized the Atlantic coast of North America. By 1750, about 1.2 million English settlers lived in 13 colonies from Maine to Georgia.

**England Battles France** The English soon became hungry for more land for their colonial population. So they pushed farther west into the continent. By doing so, they collided with France’s North American holdings. As their colonies expanded, France and England began to interfere with each other. It seemed that a major conflict was on the horizon.

In 1754 a dispute over land claims in the Ohio Valley led to a war between the British and French on the North
Chapter 20

American continent. The conflict became known as the French and Indian War. The war became part of a larger conflict known as the Seven Years’ War. Britain and France, along with their European allies, also battled for supremacy in Europe, the West Indies, and India.

In North America, the British colonists, with the help of the British Army, defeated the French in 1763. The French surrendered their North American holdings. As a result of the war, the British seized control of the eastern half of North America.

Native Americans Respond

As in Mexico and South America, the arrival of Europeans in the present-day United States had a great impact on Native Americans. European colonization brought mostly disaster for the lands’ original inhabitants.

A Strained Relationship  French and Dutch settlers developed a mostly cooperative relationship with the Native Americans. This was due mainly to the mutual benefits of the fur trade. Native Americans did most of the trapping and then traded the furs to the French for such items as guns, hatchets, mirrors, and beads. The Dutch also cooperated with Native Americans in an effort to establish a fur-trading enterprise.

The groups did not live together in complete harmony. Dutch settlers fought with various Native American groups over land claims and trading rights. For the most part, however, the French and Dutch colonists lived together peacefully with their North American hosts.

GEOGRAPHY SKILLBUILDER: Interpreting Maps

1. Region  Which nation claimed the largest area of the present-day United States in 1754?
2. Place  How did Britain’s North American empire change by 1763?

American continent. The conflict became known as the French and Indian War. The war became part of a larger conflict known as the Seven Years’ War. Britain and France, along with their European allies, also battled for supremacy in Europe, the West Indies, and India.

In North America, the British colonists, with the help of the British Army, defeated the French in 1763. The French surrendered their North American holdings. As a result of the war, the British seized control of the eastern half of North America.

Native Americans Respond

As in Mexico and South America, the arrival of Europeans in the present-day United States had a great impact on Native Americans. European colonization brought mostly disaster for the lands’ original inhabitants.

A Strained Relationship  French and Dutch settlers developed a mostly cooperative relationship with the Native Americans. This was due mainly to the mutual benefits of the fur trade. Native Americans did most of the trapping and then traded the furs to the French for such items as guns, hatchets, mirrors, and beads. The Dutch also cooperated with Native Americans in an effort to establish a fur-trading enterprise.

The groups did not live together in complete harmony. Dutch settlers fought with various Native American groups over land claims and trading rights. For the most part, however, the French and Dutch colonists lived together peacefully with their North American hosts.
The same could not be said of the English. Early relations between English settlers and Native Americans were cooperative. However, they quickly worsened over the issues of land and religion. Unlike the French and Dutch, the English sought to populate their colonies in North America. This meant pushing the natives off their land. The English colonists seized more land for their population—and to grow tobacco.

Religious differences also heightened tensions. The English settlers considered Native Americans heathens, people without a faith. Over time, many Puritans viewed Native Americans as agents of the devil and as a threat to their godly society. Native Americans developed a similarly harsh view of the European invaders.

**Settlers and Native Americans Battle** The hostility between the English settlers and Native Americans led to warfare. As early as 1622, the Powhatan tribe attacked colonial villages around Jamestown and killed about 350 settlers. During the next few years, the colonists struck back and massacred hundreds of Powhatan.

One of the bloodiest conflicts between colonists and Native Americans was known as King Philip’s War. It began in 1675 when the Native American ruler Metacom (also known as King Philip) led an attack on colonial villages throughout Massachusetts. In the months that followed, both sides massacred hundreds of victims. After a year of fierce fighting, the colonists defeated the natives. During the 17th century, many skirmishes erupted throughout North America.

**Natives Fall to Disease** More destructive than the Europeans’ weapons were their diseases. Like the Spanish in Central and South America, the Europeans who settled North America brought with them several diseases. The diseases devastated the native population in North America.

In 1616, for example, an epidemic of smallpox ravaged Native Americans living along the New England coast. The population of one tribe, the Massachusetts, dropped from 24,000 to 750 by 1631. From South Carolina to Missouri, nearly whole tribes fell to smallpox, measles, and other diseases.

One of the effects of this loss was a severe shortage of labor in the colonies. In order to meet their growing labor needs, European colonists soon turned to another group: Africans, whom they would enslave by the million.
The Atlantic Slave Trade

**MAIN IDEA**

**CULTURAL INTERACTION** To meet their growing labor needs, Europeans enslaved millions of Africans in the Americas.

**WHY IT MATTERS NOW**

Descendants of enslaved Africans represent a significant part of the Americas’ population today.

**TERMS & NAMES**

- Atlantic slave trade
- triangular trade
- middle passage

**SETTING THE STAGE** Sugar plantations and tobacco farms required a large supply of workers to make them profitable for their owners. European owners had planned to use Native Americans as a source of cheap labor. But millions of Native Americans died from disease, warfare, and brutal treatment. Therefore, the Europeans in Brazil, the Caribbean, and the southern colonies of North America soon turned to Africa for workers. This demand for cheap labor resulted in the brutalities of the slave trade.

**The Causes of African Slavery**

Beginning around 1500, European colonists in the Americas who needed cheap labor began using enslaved Africans on plantations and farms.

**Slavery in Africa** Slavery had existed in Africa for centuries. In most regions, it was a relatively minor institution. The spread of Islam into Africa during the seventh century, however, ushered in an increase in slavery and the slave trade. Muslim rulers in Africa justified enslavement with the Muslim belief that non-Muslim prisoners of war could be bought and sold as slaves. As a result, between 650 and 1600, Muslims transported about 17 million Africans to the Muslim lands of North Africa and Southwest Asia.

In most African and Muslim societies, slaves had some legal rights and an opportunity for social mobility. In the Muslim world, a few slaves even occupied positions of influence and power. Some served as generals in the army. In African societies, slaves could escape their bondage in numerous ways, including marrying into the family they served.

**The Demand for Africans** The first Europeans to explore Africa were the Portuguese during the 1400s. Initially, Portuguese traders were more interested in trading for gold than for captured Africans. That changed with the colonization of the Americas, as natives began dying by the millions.

Europeans saw advantages in using Africans in the Americas. First, many Africans had been exposed to European diseases and had built up some immunity. Second, many Africans had experience in farming and could be taught plantation work. Third, Africans were less likely to escape because they did not know their way around the new land. Fourth, their skin color made it easier to catch them if they escaped and tried to live among others.
In time, the buying and selling of Africans for work in the Americas—known as the Atlantic slave trade—became a massive enterprise. Between 1500 and 1600, nearly 300,000 Africans were transported to the Americas. During the next century, that number climbed to almost 1.3 million. By the time the Atlantic slave trade ended around 1870, Europeans had imported about 9.5 million Africans to the Americas.

**Spain and Portugal Lead the Way** The Spanish took an early lead in importing Africans to the Americas. Spain moved on from the Caribbean and began to colonize the American mainland. As a result, the Spanish imported and enslaved thousands more Africans. By 1650, nearly 300,000 Africans labored throughout Spanish America on plantations and in gold and silver mines.

By this time, however, the Portuguese had surpassed the Spanish in the importation of Africans to the Americas. During the 1600s, Brazil dominated the European sugar market. As the colony’s sugar industry grew, so too did European colonists’ demand for cheap labor. During the 17th century, more than 40 percent of all Africans brought to the Americas went to Brazil.

**Slavery Spreads Throughout the Americas**

As the other European nations established colonies in the Americas, their demand for cheap labor grew. Thus, they also began to import large numbers of Africans.

**England Dominates the Slave Trade** As England’s presence in the Americas grew, it came to dominate the Atlantic slave trade. From 1690 until England abolished the slave trade in 1807, it was the leading carrier of enslaved Africans. By the time the slave trade ended, the English had transported nearly 1.7 million Africans to their colonies in the West Indies.

African slaves were also brought to what is now the United States. In all, nearly 400,000 Africans were sold to Britain’s North American colonies. Once in North America, however, the slave population steadily grew. By 1830, roughly 2 million slaves toiled in the United States.
African Cooperation and Resistance Many African rulers and merchants played a willing role in the Atlantic slave trade. Most European traders, rather than travel inland, waited in ports along the coasts of Africa. African merchants, with the help of local rulers, captured Africans to be enslaved. They then delivered them to the Europeans in exchange for gold, guns, and other goods.

As the slave trade grew, some African rulers voiced their opposition to the practice. Nonetheless, the slave trade steadily grew. Lured by its profits, many African rulers continued to participate. African merchants developed new trade routes to avoid rulers who refused to cooperate.

A Forced Journey
After being captured, African men and women were shipped to the Americas as part of a profitable trade network. Along the way, millions of Africans died.

The Triangular Trade Africans transported to the Americas were part of a transatlantic trading network known as the triangular trade. Over one trade route, Europeans transported manufactured goods to the west coast of Africa. There, traders exchanged these goods for captured Africans. The Africans were then transported across the Atlantic and sold in the West Indies. Merchants bought sugar, coffee, and tobacco in the West Indies and sailed to Europe with these products.

On another triangular route, merchants carried rum and other goods from the New England colonies to Africa. There they exchanged their merchandise for Africans. The traders transported the Africans to the West Indies and sold them for sugar and molasses. They then sold these goods to rum producers in New England.
Various other transatlantic routes existed. The “triangular” trade encompassed a network of trade routes crisscrossing the northern and southern colonies, the West Indies, England, Europe, and Africa. The network carried a variety of traded goods. The Middle Passage The voyage that brought captured Africans to the West Indies and later to North and South America was known as the middle passage. It was considered the middle leg of the transatlantic trade triangle. Sickening cruelty characterized this journey. In African ports, European traders packed Africans into the dark holds of large ships. On board, Africans endured whippings and beatings from merchants, as well as diseases that swept through the vessel. Numerous Africans died from disease or physical abuse aboard the slave ships. Many others committed suicide by drowning. Scholars estimate that roughly 20 percent of the Africans aboard each slave ship perished during the brutal trip.

Slavery in the Americas

Africans who survived their ocean voyage faced a difficult life in the Americas. Forced to work in a strange land, enslaved Africans coped in a variety of ways. A Harsh Life Upon arriving in the Americas, captured Africans usually were auctioned off to the highest bidder. After being sold, slaves worked in mines or fields or as domestic servants. Slaves lived a grueling existence. Many lived on little food in small, dreary huts. They worked long days and suffered beatings. In much of the Americas, slavery was a lifelong condition, as well as a hereditary one. Resistance and Rebellion To cope with the horrors of slavery, Africans developed a way of life based on their cultural heritage. They kept alive such things as their musical traditions as well as the stories of their ancestors.
Slaves also found ways to resist. They made themselves less productive by breaking tools, uprooting plants, and working slowly. Thousands also ran away.

Some slaves pushed their resistance to open revolt. As early as 1522, about 20 slaves on Hispaniola attacked and killed several Spanish colonists. Larger revolts occurred throughout Spanish settlements during the 16th century.

Occasional uprisings also occurred in Brazil, the West Indies, and North America. In 1739, a group of slaves in South Carolina led an uprising known as the Stono Rebellion. Uprisings continued into the 1800s.

**Consequences of the Slave Trade**

The Atlantic slave trade had a profound impact on both Africa and the Americas. In Africa, numerous cultures lost generations of their fittest members—their young and able—to European traders and plantation owners. In addition, countless African families were torn apart. Many of them were never reunited. The slave trade devastated African societies in another way: by introducing guns into the continent.

While they were unwilling participants in the growth of the colonies, African slaves contributed greatly to the economic and cultural development of the Americas. Their greatest contribution was their labor. Without their back-breaking work, colonies such as those on Haiti and Barbados may not have survived. In addition to their muscle, enslaved Africans brought their expertise, especially in agriculture. They also brought their culture. Their art, music, religion, and food continue to influence American societies.

The influx of so many Africans to the Americas also has left its mark on the very population itself. From the United States to Brazil, many of the nations of the Western Hemisphere today have substantial African-American populations. Many Latin American countries have sizable mixed-race populations.

As the next section explains, Africans were not the only cargo transported across the Atlantic during the colonization of the Americas. The settlement of the Americas brought many different items from Europe, Asia, and Africa to North and South America. It also introduced items from the Americas to the rest of the world.
ECONOMICS  The colonization of the Americas introduced new items into the Eastern and Western hemispheres.  

WHY IT MATTERS NOW  This global exchange of goods permanently changed Europe, Asia, Africa, and the Americas.

TERMS & NAMES  •  Columbian Exchange  •  capitalism  •  joint-stock company  •  mercantilism  •  favorable balance of trade

SETTING THE STAGE  The colonization of the Americas dramatically changed the world. It prompted both voluntary and forced migration of millions of people. It led to the establishment of new and powerful societies. Other effects of European settlement of the Americas were less noticeable but equally important. Colonization resulted in the exchange of new items that greatly influenced the lives of people throughout the world. The new wealth from the Americas resulted in new business and trade practices in Europe.

The Columbian Exchange

The global transfer of foods, plants, and animals during the colonization of the Americas is known as the Columbian Exchange. Ships from the Americas brought back a wide array of items that Europeans, Asians, and Africans had never before seen. They included such plants as tomatoes, squash, pineapples, tobacco, and cacao beans (for chocolate). And they included animals such as the turkey, which became a source of food in the Eastern Hemisphere.

Perhaps the most important items to travel from the Americas to the rest of the world were corn and potatoes. Both were inexpensive to grow and nutritious. Potatoes, especially, supplied many essential vitamins and minerals. Over time, both crops became an important and steady part of diets throughout the world. These foods helped people live longer. Thus they played a significant role in boosting the world’s population. The planting of the first white potato in Ireland and the first sweet potato in China probably changed more lives than the deeds of 100 kings.

Traffic across the Atlantic did not flow in just one direction, however. Europeans introduced various livestock animals into the Americas. These included horses, cattle, sheep, and pigs. Foods from Africa (including some that originated in Asia) migrated west in European ships. They included bananas, black-eyed peas, and yams. Grains introduced to the Americas included wheat, rice, barley, and oats.

Some aspects of the Columbian Exchange had a tragic impact on many Native Americans. Disease was just as much a part of the Columbian Exchange as goods and food. The diseases Europeans brought with them, which included smallpox and measles, led to the deaths of millions of Native Americans.
The Columbian Exchange

Few events transformed the world like the Columbian Exchange. This global transfer of plants, animals, disease, and especially food brought together the Eastern and Western hemispheres and touched, in some way, nearly all the peoples of the world.

Frightening Foods
Several foods from the Americas that we now take for granted at first amazed and terrified Europeans. Early on, people thought the tomato was harmful to eat. One German official warned that the tomato “should not be taken internally.” In 1619, officials in Burgundy, France, banned potatoes, explaining that “too frequent use of them caused the leprosy.” In 1774, starving peasants in Prussia refused to eat the spuds.

Patterns of Interaction
The Geography of Food: The Impact of Potatoes and Sugar
Think about your favorite foods. Chances are that at least one originated in a distant land. Throughout history, the introduction of new foods into a region has dramatically changed lives—for better and worse. Dependence on the potato, for example, led to a famine in Ireland. This prompted a massive migration of Irish people to other countries. In the Americas, the introduction of sugar led to riches for some and enslavement for many others.

“The culinary life we owe Columbus is a progressive dinner in which the whole human race takes part but no one need leave home to sample all the courses.”
—Raymond Sokolov

1. Forming Opinions Have students work in small groups to pose and answer questions about the beneficial and harmful aspects of the Columbian Exchange.

2. Comparing and Contrasting Find out what major items are exchanged or traded between the United States and either Asia, Africa, or Europe. How do the items compare with those of the Columbian Exchange? Report your findings to the class.
A Spanish missionary in Mexico described the effects of smallpox on the Aztecs:

**PRIMARY SOURCE**

There was a great havoc. Very many died of it. They could not walk. . . . They could not move; they could not stir; they could not change position, nor lie on one side; nor face down, nor on their backs. And if they stirred, much did they cry out. Great was its destruction.

**BERNARDINO DE SAHAGUN,** quoted in *Seeds of Change*

Other diseases Europeans brought with them included influenza, typhus, malaria, and diphtheria.

**Global Trade**

The establishment of colonial empires in the Americas influenced the nations of Europe in still other ways. New wealth from the Americas was coupled with a dramatic growth in overseas trade. The two factors together prompted a wave of new business and trade practices in Europe during the 16th and 17th centuries. These practices, many of which served as the root of today’s financial dealings, dramatically changed the economic atmosphere of Europe.

**The Rise of Capitalism** One aspect of the European economic revolution was the growth of capitalism. Capitalism is an economic system based on private ownership and the investment of resources, such as money, for profit. No longer were governments the sole owners of great wealth. Due to overseas colonization and trade, numerous merchants had obtained great wealth. These merchants continued to invest their money in trade and overseas exploration. Profits from these investments enabled merchants and traders to reinvest even more money in other enterprises. As a result, businesses across Europe grew and flourished.

The increase in economic activity in Europe led to an overall increase in many nations’ money supply. This in turn brought on inflation, or the steady rise in the price of goods. Inflation occurs when people have more money to spend and thus demand more goods and services. Because the supply of goods is less than the demand for them, the goods become both scarce and more valuable. Prices then rise. At this time in Europe, the costs of many goods rose. Spain, for example, endured a crushing bout of inflation during the 1600s, as boatloads of gold and silver from the Americas greatly increased the nation’s money supply.

**Joint-Stock Companies** Another business venture that developed during this period was known as the joint-stock company. The joint-stock company worked much like the modern-day corporation, with investors buying shares of stock in a company. It involved a number of people combining their wealth for a common purpose.
Chapter 20

In Europe during the 1500s and 1600s, that common purpose was American colonization. It took large amounts of money to establish overseas colonies. Moreover, while profits may have been great, so were risks. Many ships, for instance, never completed the long and dangerous ocean voyage. Because joint-stock companies involved numerous investors, the individual members paid only a fraction of the total colonization cost. If the colony failed, investors lost only their small share. If the colony thrived, the investors shared in the profits. It was a joint-stock company that was responsible for establishing Jamestown, England’s first North American colony.

The Growth of Mercantilism

During this time, the nations of Europe adopted a new economic policy known as mercantilism. The theory of mercantilism (shown above) held that a country’s power depended mainly on its wealth. Wealth, after all, allowed nations to build strong navies and purchase vital goods. As a result, the goal of every nation became the attainment of as much wealth as possible.
Balance of Trade  According to the theory of mercantilism, a nation could increase its wealth and power in two ways. First, it could obtain as much gold and silver as possible. Second, it could establish a favorable balance of trade, in which it sold more goods than it bought. A nation’s ultimate goal under mercantilism was to become self-sufficient, not dependent on other countries for goods. An English author of the time wrote about the new economic idea of mercantilism:

**PRIMARY SOURCE**

Although a Kingdom may be enriched by gifts received, or by purchases taken from some other Nations . . . these are things uncertain and of small consideration when they happen. The ordinary means therefore to increase our wealth and treasure is by Foreign Trade, wherein we must ever observe this rule: to sell more to strangers yearly than we consume of theirs in value.

THOMAS MUN, quoted in World Civilizations

Mercantilism went hand in hand with colonization, for colonies played a vital role in this new economic practice. Aside from providing silver and gold, colonies provided raw materials that could not be found in the home country, such as wood or furs. In addition to playing the role of supplier, the colonies also provided a market. The home country could sell its goods to its colonies.

**Economic Revolution Changes European Society**  The economic changes that swept through much of Europe during the age of American colonization also led to changes in European society. The economic revolution spurred the growth of towns and the rise of a class of merchants who controlled great wealth.

The changes in European society, however, only went so far. While towns and cities grew in size, much of Europe’s population continued to live in rural areas. And although merchants and traders enjoyed social mobility, the majority of Europeans remained poor. More than anything else, the economic revolution increased the wealth of European nations. In addition, mercantilism contributed to the creation of a national identity. Also, as Chapter 21 will describe, the new economic practices helped expand the power of European monarchs, who became powerful rulers.
The Atlantic World

• Beginning around 1500, the Spanish and Portuguese colonize Central and South America and establish prosperous overseas empires.
• Throughout the 1600s and 1700s, the English, French, and Dutch battle for control of North America, with the English emerging victorious.

Terms & Names
For each term or name below, briefly explain its connection to the Atlantic world from 1492 to 1800.
1. conquistador
2. encomienda
3. Jamestown
4. French and Indian War
5. Atlantic slave trade
6. triangular trade
7. Columbian Exchange
8. mercantilism

Main Ideas
Spain Builds an American Empire Section 1 (pages 553–560)
9. Why did Columbus set sail westward?
10. What were three goals of the Spanish in the Americas?
11. Why did Papé lead a rebellion against the Spanish?

European Nations Settle North America Section 2 (pages 561–565)
12. What did the Europeans mostly grow in their Caribbean colonies?
13. What was the result of the French and Indian War?

The Atlantic Slave Trade Section 3 (pages 566–570)
14. What factors led European colonists to use Africans to resupply their labor force?
15. What were the conditions on board a slave ship?
16. What were several ways in which enslaved Africans resisted their treatment in the Americas?

The Columbian Exchange and Global Trade Section 4 (pages 571–575)
17. Why was the introduction of corn and potatoes to Europe and Asia so significant?
18. What was the economic policy of mercantilism?

Critical Thinking
1. Using Your Notes
Use the chart to identify which nation sponsored each explorer and the regions he explored.

<table>
<thead>
<tr>
<th>Explorer</th>
<th>Nation</th>
<th>Regions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cabral</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Magellan</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Cartier</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

2. Drawing Conclusions
Emperor Building What factors helped the Europeans conquer the Americas? Which was the most important? Why?

3. Recognizing Effects
Economics Explain the statement, “Columbus’s voyage began a process that changed the world forever.” Consider all the peoples and places American colonization affected economically.

4. Comparing and Contrasting
Cultural Interaction What might have been some of the differences in the Europeans’ and Native Americans’ views of colonization?

5. Synthesizing
How did enslaved Africans help create the societies in the New World?

Visual Summary

The Atlantic World

Europeans
• Beginning around 1500, the Spanish and Portuguese colonize Central and South America and establish prosperous overseas empires.
• Throughout the 1600s and 1700s, the English, French, and Dutch battle for control of North America, with the English emerging victorious.

Native Americans
• Between 1521 and 1533, the once mighty Aztec and Incan empires fall to the invading Spanish.
• Throughout the Americas, the native population is devastated by European conquests and diseases.

Africans
• Beginning around 1500, millions of Africans are taken from their homeland and forced to labor as slaves in the Americas.
• Africans eventually become an important part of the Americas, as they populate the various regions and share aspects of their culture.
Use the quotation and your knowledge of world history to answer questions 1 and 2.
Additional Test Practice, pp. S1–S33

PRI M A R Y  S O U R C E
Where there is a vacant place, there is liberty for . . . [Christians] to come and inhabit, though they neither buy it nor ask their leaves. . . . Indeed, no nation is to drive out another without special commission from Heaven . . . unless the natives do unjustly wrong them, and will not recompense the wrongs done in a peaceable fort [way]. And then they may right themselves by lawful war and subdue the country unto themselves.

JOHN COTTON, from “God’s Promise to His Plantation”

1. What do you think Native Americans might have said about Cotton’s statement that America was a “vacant place”?
   A. agreed that the continent was largely empty
   B. discussed development plans with him
   C. pointed out that they inhabited the land
   D. offered to sell the land to him

2. How might the last part of Cotton’s statement have helped the Puritans justify taking land from the Native Americans?
   A. Puritans could claim natives had wronged them.
   B. Natives could claim Puritans had wronged them.
   C. Puritans believed war was wrong in all circumstances.
   D. Native Americans were willing to negotiate their grievances.

3. How does the artist depict the clash of Aztec and Spanish cultures?
   A. meeting to negotiate peace
   B. meeting as warriors
   C. engaging in a sports competition
   D. meeting as friends

ALTERNATIVE ASSESSMENT
1. Interact with History
   On page 552 you examined the choices some Native Americans faced during the invasion by Spanish conquistadors. Now that you have read the chapter, rethink the choice you made. If you chose to side with the Spaniards, would you now change your mind? Why? If you decided to fight with the Aztecs, what are your feelings now? Discuss your thoughts and opinions with a small group.

2. Writing About History
   An English colony would have looked strange and different to a Native American of the time. Write a paragraph describing an English colony of the 17th century. In your paragraph, provide details about the following:
   - clothes
   - food
   - shelter
   - weapons

INTEGRATED TECHNOLOGY
TEST PRACTICE Go to classzone.com
- Diagnostic tests
- Tutorials
- Strategies
- Additional practice
Monarchy in the Incan Empire, 1438–1535

The Incan monarchy was different from European monarchies. In the Incan Empire, all people worked for the state, either as farmers, or artisans making cloth, for example. Men also served as road builders, as messengers, or as soldiers. The state provided clothing, food, and any necessities in short supply. Every year, the amount of land every family had was reviewed to make sure it could produce enough food to live on.
Oligarchy in the Italian City-States, 1000–1870

Oligarchy is government by a small group of people. In Venice, citizens elected a great council, but real power was held by the senate, which made all decisions. Only members of 125 to 150 wealthy and cultured families were eligible for membership.

Militarism in Tokugawa Japan, 1603–1867

A militaristic government is run by the military. All those in power under the Tokugawa shoguns were samurai. As the samurais’ work became more administrative than military, the Tokugawa rulers encouraged cultural pursuits such as poetry, calligraphy, and the tea ceremony to keep warlike tendencies in check.

Bureaucracy in the Ottoman Empire, 1451–1922

A bureaucratic government is organized into departments and offices staffed by workers who perform limited tasks. Because of the size of the empire, the Ottoman bureaucracy required tens of thousands of civil servants. The empire also supported and encouraged the arts.

Comparing & Contrasting

1. In what ways did the Incan government resemble the Ottoman bureaucracy?
2. What similarities and differences were there in the way the sultans and shoguns controlled government officials?
3. What characteristic did the ruling class of the Italian city-states and Tokugawa Japan have in common?
Structures of Government

All of the governments have officials at different levels with varying degrees of power and responsibility. Compare the governmental structure of the Ottoman bureaucracy with that of Tokugawa Shogunate’s militaristic government using the charts below.

**Organization of the Ottoman Government**

- **Sultan**: Supreme military and political ruler
- **Imperial Council (Divan)**: Advisers drawn from *devshirme*
- **Social / Military Administration**
  - Local administrators/military
  - Landowners/tax collectors
- **Religious / Judicial Administration**
  - Heads of individual religious millets
  - Muslim
  - Jewish
  - Christian

**Organization of the Tokugawa Shogunate**

- **Emperor**: Held highest rank in society but had no political power
- **Shogun**: Actual ruler
- **Daimyo**: Large landowners
- **Samurai Warriors**: Loyal to daimyo and shogun
- **Peasants**: Four-fifths of the population
- **Merchants**: Low status gradually gained influence
- **Artisans**: Craftspeople such as artists and blacksmiths

**SKILLBUILDER: Interpreting Charts**

1. **Clarifying** To whom were the heads of the millets answerable?
2. **Drawing Conclusions** How might the samurai’s loyalty to his daimyo conflict with his loyalty to the shogun?
Artifacts of Power

The everyday objects used by members of government often serve a symbolic purpose. Note how the objects below communicated the rank and importance of the person who used them. Examine them and consider the effect they probably had on the people who saw them.

Japanese Sword
Beautiful weapons and armor were symbols of status and power in Tokugawa Japan. Swords were the special weapons of the samurai, who were the only people allowed to carry arms. Daimyo had artisans make fine swords with expensively decorated hilts and scabbards for ceremonial occasions.

Italian Medici Pitcher
As well as being great patrons of the fine arts, wealthy Italians surrounded themselves with luxurious practical objects. Even ordinary items, like a pitcher, were elaborately made of expensive materials.

Incan Headdress
All of the people in the Incan Empire were required to wear the clothing of their particular ethnic group. The patterns on clothes and headdresses immediately identified a person's place of birth and social rank.

1. How did the role of the sultan compare with the role of the Japanese emperor?
2. What message were expensive personal items meant to convey?
3. How does a household item like the pitcher differ from a sword or headdress as a symbol of power?
Architecture of Government

A ruler’s castle or palace was a luxurious and safe home where he was surrounded by vassals who protected him. It was also a center of government where his administrators carried on their work under his supervision. Castles and palaces are a show of greatness. Large rooms that accommodate many guests demonstrate the ruler’s authority over many people. Rich decorations display the ruler’s wealth, refinement, and superior rank.

Japanese Palace

Osaka Castle was originally built by Toyotami Hideyoshi and has been rebuilt twice since then due to fire. It is surrounded by gardens, and the interior was known for its wall paintings and painted screens. During the Tokugawa period, the city of Osaka was a center of trade for agricultural and manufactured goods. The city was governed directly by the shoguns who owned the castle.

Ottoman Palace

Topkapi Palace in modern Istanbul, Turkey, was the home of the Ottoman sultans. The buildings were built around several courtyards. Within the outer walls were gardens, a school for future officials, the treasury, and an arsenal. Elaborate paintings, woodwork, and tile designs decorated the walls and ceilings of rooms used by the sultan and his high officials.
Machiavelli

In this excerpt from The Discourses, Italian writer Niccolò Machiavelli discusses six types of government—three good and three bad.

[The three bad ones result from the degradation of the other three. . . . Thus monarchy becomes tyranny; aristocracy degenerates into oligarchy; and the popular government lapses readily into licentiousness [lack of restraint].

Sagacious legislators . . . have chosen one that should partake of all of them, judging that to be the most stable and solid. In fact, when there is combined under the same constitution a prince, a nobility, and the power of the people, then these three powers will watch and keep each other reciprocally in check.

DOCUMENT-BASED QUESTION
Why does Machiavelli think a combined government is the best type of government?

Garcilaso de la Vega

This description of government administration comes from Garcilaso’s history of the Inca.

[Local administrators] were obliged each lunar month to furnish their superiors . . . with a record of the births and deaths that had occurred in the territory administered by them. . . .

Every two years . . . the wool from the royal herds was distributed in every village, in order that each person should be decently clothed during his entire life. It should be recalled that . . . the people . . . possessed only very few cattle, whereas the Inca’s and the Sun’s herds were . . . numerous. . . . Thus everyone was always provided with clothing, shoes, food, and all that is necessary in life.

DOCUMENT-BASED QUESTION
What and how did the Incan authorities provide for the common people’s needs?

Comparing & Contrasting

1. How do Osaka Castle and Topkapi Palace project the importance of their owners? Explain.

2. Does Machiavelli favor a system of government that would provide directly for people’s needs? Explain.

EXTENSION ACTIVITY
Use the library to get some additional information about the government structure of the Incan Empire and Renaissance Venice. Then draw an organizational chart for each of those governments like the charts on page 580.
On July 14, 1789, an angry French mob attacked the Bastille, a state prison in Paris, because it was looking for arms and gunpowder. The capture of this prison is considered the beginning of the French Revolution.

Political Revolutions

In Unit 5, you will learn that new ideas about human rights and government led to political revolutions in many countries during the late 1700s and the 1800s. At the end of the unit, you will have a chance to compare and contrast those revolutions. (See pages 706–711.)
